MELVIN WYANT

Dear Rose Lovers

Again it is my pleasure to put this colorful Rose catalog in your hands. Roses have been my business for forty years, and in that time Wyant Roses have won a reputation for top quality. Their better root systems assure you of better results. They are extra hardy because they are raised in a severe climate.

I have put so much love, hard work and time into the raising of the fine three-year-old Roses listed in this catalog that I'm very anxious that those you choose give you the beauty and pleasure they should. In consequence, when you place your order, I will consider it a favor for you to ask any questions that you may have about planting or caring for your Roses.

Your complete satisfaction is a matter of importance to me.

With every good wish,

MELVIN E. WYANT

ANGEL WINGS. New exhibition Rose. The creamy white bud with pink suffusion on the outer petals opens to a nearly white bloom with pink shadings on the outer petals and a cream center. Fragrant. 37 petals. *Plant Pat. 1865.* \$3.00 each; 3 for \$7.95.

ARDELLE. A beautifully formed, near white Rose. The opening bud stands high in the center, with the expanding petals curling gracefully. Light, sweet fragrance. About 100 petals. *Plant Pat. App. for.* \$2.50 each; 3 for \$6.60.

BURNABY. A beautiful new white. The exquisitely formed blooms show a soft golden color at the base as the large white reflexed petals curl back. Long, high-centered buds. Faint, sweet fragrance. 65 petals. *Plant Pat. 1314.* \$2.50 each; 3 for \$6.60.

ALL No. 1 GRADE, 3-YEAR-OLD FIELD-GROWN PLANTS

CHARLES MALLERIN. A gorgeous red Rose with intriguing dark shadings. It is one of our darkest red Roses and does not blue. The form is always a thrill, with about 35 broad, heavy petals. Vigorous, thorny and upright, producing quality rather than quantity. Rich, pronounced fragrance. *Plant Pat. 933.* \$2.50 each; 3 for \$6.60.

CHARLOTTE ARMSTRONG. One of the very finest Roses.  Delightful large, long, slender, carmine-red buds open into magnificent deep glistening rose-pink blooms. Only about 30 petals, but they are large, making a full, beautiful flower. The bush is very vigorous, with long, strong stems fine for cutting. Very light fragrance. \$1.75 each; 3 for \$4.75.

CHRYSLER IMPERIAL. One of the largest, most perfect blooms. Buds are globular and pointed, opening to immense, glowing oxblood-red flowers on long, sturdy stems. It will be popular for many years, for it is a grand Rose. Growth is compact and symmetrical. It has an abundance of rich, heady fragrance. 45 to 50 crisp, wide petals. *Plant Pat. 1167.* \$2.50 each; 3 for \$6.60. 

CONDESA DE SASTAGO. The intense two-tone color, red and yellow, is so striking that almost everyone who sees it wants it. Blooms are large, globular, double and very fragrant. A vigorous, medium tall grower. 63 petals. \$1.50 each; 3 for \$4.00.

CONFIDENCE. A peach-toned pastel Rose, a delicious blend of bright, light tints deepening at the edges. Its form is always notable, with long streamlined buds. A good, upright plant producing a lot of re-bloom quickly. Sweet fragrance. 28 petals. *Plant Pat. 1192.* \$2.50 each; 3 for \$6.60.

CURLY PINK. A large, very double Rose. A good, upright grower and better than average bloomer. The deep rose-pink petals curl at the ends attractively. Strong spicy fragrance. 65 petals. *Plant Pat. 842.* \$1.85 each; 3 for \$5.00.

DR. DEBAT. A glorious large, well-shaped bloom of the show type. It makes you glad you like pink Roses. It is a true, rich, fresh pink. The 30 heavy, firm petals open out to 5 to 6 inches. Large plant with strong stems. Tea fragrance. *Plant Pat. 961.* \$2.25 each; 3 for \$6.00.

DUQUESA DE PENARANDA. The deep copper color of the large petals is very showy and attractive. The bush is a robust, compact grower which needs black-spot protection, as do most varieties of this unusual color. Fragrant. 38 petals. \$1.75 each; 3 for \$4.75.

ECLIPSE. Long, streamlined buds enhanced by very ornamental sepals; lemon-yellow without shading. There is an abundance of the long buds. Faint clove fragrance. 25 petals. \$1.75 each; 3 for \$4.75.

The well-shaped blooms have 25 to 30 petals; mildly fragrant. A moderate grower. *Plant Pat. 792.* \$2.50 each; 3 for \$6.60.

JEANIE. This new introduction of ours greatly resembles Peace, but it blooms at least three times more than Peace does. It is a strong, branchy grower, producing an abundance of large, exhibition-type, light-colored blossoms with the outer petals generally a delicate pink and the balance of the high-centered flower whitish, turning to cream at the full center. Sweet, clear fragrance. 65 petals. *Plant Pat. App.* for. \$2.50 each; 3 for \$6.60.

DEAN COLLINS. Pink shadings that are described as luminous rose-opal and carmine with the color deepening during the heat of the Summer. Full double, long-lasting blooms. Called the "lazy gardener's Rose." 81 petals. *Plant Pat. 1279.* \$2.00 each; 3 for \$5.25.

QUEEN ELIZABETH. 1955 All-America Winner. Being a Grandiflora, it gives the quantity of bloom of a Floribunda but has the size of Hybrid Tea blooms. The deep pink, globular buds are long lasting and are much like Hybrid Tea Roses. They have 25 large petals. *Plant Pat. 1259.* \$2.50 each; 3 for \$6.60.

ROUNDELAY. The perfect, deep rich red blooms are double and long lasting. The plant is a true Grandiflora with the stems in the clusters long enough for cutting. Fine fragrance. 55 petals. *Plant Pat. 1280.* \$2.50 each; 3 for \$6.60.

STARFIRE. A fine new All-America Winner with luminous currant-red flowers that suggested its name. The bush is vigorous and an extremely profuse bloomer. It provides a great show in the garden. The petals are large and stiff, making a long-lasting bloom. Tall, vigorous grower. Slight fragrance. 18 large petals of good substance. *Plant Pat. 1742.* \$3.00 each; 3 for \$7.95.

HYBRID PERPETUAL ROSES

Hybrid Perpetuals or "June bloomers" generally burst into a marvelous display of bloom in June. Many will bloom again later in the season. Their flowers on the whole are more fragrant than any other class and are very large. The plants are too large to fit in a bed of Hybrid Teas but are more fool-proof and long-lived. Plant them in the background and in shrub borders. Many of the strongest can be trained as pillars.

CANDEUR LYONNAISE. A white Hybrid Perpetual that is more abundant in its bloom than Frau Karl Druschki. The blossoms are not large but are produced in great quantity throughout the entire season. \$1.85 each; 3 for \$5.00.

FRAU KARL DRUSCHKI. A very strong, tall grower which blooms sparsely during the Summer and Fall after bearing bountifully in the Spring. Pure white when open, with prominent yellow stamens but little fragrance. Very large, attractive flowers. \$1.50 each; 3 for \$4.00.

GENERAL JACQUEMINOT (General Jack for short). One of the greatest favorites of the old Roses. It has large, very double and very fragrant, deep red blooms mostly in June. \$1.50 each; 3 for \$4.00.

GEORG ARENDS. The charming perfect rose-pink blooms make it greatly esteemed. Flowers are high centered and especially well formed. Very fragrant. \$1.50 each; 3 for \$4.00.

MRS. JOHN LAING. You can't forget the delicious fragrance of these large, full, double, soft pink, cupped blooms. The two-tone pink flowers come occasionally in Summer and Fall and abundantly in June. \$1.50 each; 3 for \$4.00.

PAUL NEYRON. The largest pink Rose, with almost thornless stems. Blooms abundantly in June and sparingly in late Summer. Very little fragrance. \$1.50 each; 3 for \$4.00.

ULRICH BRUNNER. One of the charming old hardy kinds. The large, globular, cherry-red blooms are refreshing and very lasting. \$1.50 each; 3 for \$4.00.

SHRUB ROSES

These Roses are valuable in masses, hedges, shrub borders, or as specimens on account of their profusion of bloom, their hardiness, healthiness and ability to thrive under adverse conditions.

GROOTENDORST SUPREME. In bloom from early Spring until late Fall. Large clusters of fringed, carnation-like red flowers. Upright. Can be kept at any height by pruning. \$1.50 each; 3 for \$4.00.

HARISON'S YELLOW. A lovely old-fashioned shrub Rose. Double, deep yellow flowers. The fact that it was originated in 1830 and is still popular proves its unusual value. 6 ft. \$1.75 each; 3 for \$4.75.

HUGONIS (The Golden Rose of China). The bright yellow, 2-inch flowers appear the earliest of any Rose in the Spring. It grows about 6 feet high, and its branches covered with blooms arch gracefully. One of the finest shrubs for specimen planting. \$1.50 each; 3 for \$4.00.

MME. HARDY. One of the lovely old Roses, with white blooms full of small petals. Flowers are cupped, very fragrant and sometimes in clusters. A good, hardy, disease-resistant bush. \$1.85 each; 3 for \$5.00.

FASCINATING MINIATURE ROSES

© BABY GOLD STAR

A BORDER OF MINIATURE ROSES

Miniature Roses are hardy, everblooming little babies that add interest and pleasure to your garden. They have fine, feathery foliage and such small blooms that the buds are not much bigger than a grain of wheat and blooms are from the size of your thumb-nail to 1½ inches in diameter. They bloom almost continuously if kept watered well or mulched and can be grown in any good Rose-garden soil. They are excellent for borders, rock gardens, flower beds, porch boxes as well as indoor growing. They are grown and shipped in attractive green plastic pots. An occasional dusting or spraying keeps them healthy, and in severe climates a Rose pot inverted over them is sufficient Winter protection. In our climate they come through the Winter perfectly with no protection whatever.

BABY GOLD STAR. Graceful, long, golden orange buds open fully double, deep buttercup-yellow. Rich shiny green foliage. Plants grow a little taller than most Miniatures. \$1.35 each; 3 for \$3.50.

CINDERELLA. This is exquisitely dainty. It is white, sometimes lightly tinted with a delicate cameo-pink, especially in the heart of the flower. The form is especially beautiful. It has 40 to 60 petals in its tiny 1-inch breadth. *Plant Pat. 1051.* \$1.25 each; 3 for \$3.30.

FROSTY. Pink buds expand into large, double, snow-white blossoms. Blooms freely. *Plant Pat. 1412.* \$1.35 each; 3 for \$3.50.

GRENADINE. Flowers are medium large and fully double. A bright rich red color. \$1.35 each; 3 for \$3.50.

KAROLYN. Striking orange-red, about the color of Spartan. The blossoms are small but perfectly formed. Indeed one of the gems of the Miniatures. \$1.35 each; 3 for \$3.50.

MIDGET. Such perfect midget flowers! Very double, ¾-inch, rose-red blooms come in clusters. A dense, compact, vigorous grower. \$1.25 each; 3 for \$3.30.

MON PETIT. A free bloomer with dark pink flowers, which are small but very double. Popular with visitors. \$1.35 each; 3 for \$3.50.

PRESUMIDA. Recent introduction of bright orange, gold and salmon. Two-tone, like Talisman in bud and flower. \$1.25 each; 3 for \$3.30.

PRINCE CHARMING. A new deep red. The small double flowers are lighter toward the center and have attractive yellow stamens. \$1.25 each; 3 for \$3.30.

RED IMP. This new Miniature Rose is a bright, rich crimson. It is an unfading, even color with no light markings. Fully, solidly double, with about 50 petals packed tightly right to the center. Opens very flat. The beautiful buds and blooms are as perfectly formed as the best of the big Roses. *Plant Pat. 1032.* \$1.25 each; 3 for \$3.30.

ROSA ROULETTI. Once thought to be lost to cultivation, it unexpectedly turned up as a pot plant on the window ledge of a Swiss cottage. The plant grows about 6 inches tall in bushy form, is healthy and hardy, and blooms from early Summer until frost. The tiny, rose-pink, quite double flowers are less than an inch in diameter. Popular as an edging plant in front of Rose beds. Vigorous, hardy and long lived. \$1.25 each; 3 for \$3.30.

SPRING SONG. The first time offered. A big, clear rose-pink blossom. Vigorous grower with spreading habit. \$1.35 each; 3 for \$3.50.

SWEET FAIRY. Deep pink buds, opening to very double, 1-inch blossoms of a cheerful bright apple-blossom-pink shade. The fine, long-lasting flowers are carried on wiry, upright stems to permit easy arrangements in vases or corsages, for which they are especially fine. Rich true Rose fragrance. *Plant Pat. 748.* \$1.25 each; 3 for \$3.30.

TRICOLOR. So distinctly charming. The perfect little buds show yellow, pink and red colors and present a salmon effect. The pointed petals are larger on the outside of the flower. \$1.25 each; 3 for \$3.30.

WHITE BABY STAR. Same as Baby Gold Star, with white blooms. This is a sport of Baby Gold Star. Plant characteristics are identical; only difference is in color of bloom. \$1.25 each; 3 for \$3.30.

ZWERGKONIG (King of the Elves). Perfectly formed, small, deep red, double blossoms. One of the best of the Miniatures. \$1.35 each; 3 for \$3.50.

The Climbing Roses offered here are the best of their class. These newer Climbers have disease-resistant foliage, large blooms, and long stems suitable for cutting. A carefully trained plant is a real spectacle when in full bloom. Do not prune more than enough to keep the plant within bounds. Prune soon after the big June bloom.

BLAZE. Great clusters of scarlet bloom. Showy and hardy. Very popular. Usually gives recurring bloom throughout the season. Often called the everblooming Paul's Scarlet Climber. \$1.50 each; 3 for \$4.00.

CRIMSON GLORY, CLIMBING. The rich deep crimson color of the Hybrid Tea is transferred to the Climber. It does not bloom as steadily as the Hybrid Tea but it is very worthwhile. Intensely fragrant. In this climate it should be protected. *Plant Pat. 736.* \$2.50 each; 3 for \$6.60.

DOUBLOONS. One of the hardy Horvath hybrids. A vigorous, upright, tall grower with big semi-double, bronze-yellow blooms. Pungent odor. \$2.00 each; 3 for \$5.25.

DREAM GIRL. Properly called everblooming. Produces a fine crop of flowers in early June, followed by a succession of bloom throughout Summer and Fall. A robust, hardy grower giving quantities of salmon-pink, blooms with spicy scent. *Plant Pat. 643.* \$2.25 each; 3 for \$6.00.

DR. J. H. NICOLAS. The large, real double, soft rose-pink blooms occur abundantly through the season. Not a rampant grower but should reach 7 feet. Rich old Rose fragrance. \$2.00 each; 3 for \$5.25.

GOLDEN CLIMBER. The large, golden yellow blooms maintain their color until they fall, and are of beautiful form. Best grown in full sun. Vigorous grower. Light fragrance. \$1.75 each; 3 for \$4.75.

GOLDEN KING. One of the best yellow Climbers. The healthy, deep green foliage is attractive whether its recurrent blossoms are in evidence or not. The medium-sized blooms are a good butter-yellow and hold their color well. Its medium vigorous growth makes it good for fences as well as trellises. \$2.50 each; 3 for \$6.60.

GOLDEN SHOWERS. \$2.75

ROSES

GOLDEN SHOWERS. An All-America Winner for 1957. The flowers are a lovely daffodil-yellow, borne in great profusion in the Spring. The medium-sized, 25 to 30-petaled blooms recur exceptionally well throughout the season. Medium strong growth. *Plant Pat. 1557.* \$2.75 each; 3 for \$7.20.

ICELAND QUEEN. An immense white Rose. The big, double, highly fragrant blossoms come in great masses in mid-Spring. The plant is a large, strong, hardy grower. \$1.75 each; 3 for \$4.75.

INSPIRATION. A recurrent-blooming Climber that is fairly hardy in this climate. Some Winters it will freeze to the ground, but a covering of burlap or wrapping paper around its branches usually protects it sufficiently so that the branches will stay green. Large, shiny, two-tone pink blooms on long stems. \$2.00 each; 3 for \$5.25.

KATIE. A fine new pink everblooming Climber, presented by its originator Conrad O'Neal to the Stark Rose Society. The delightfully fragrant, two-tone blossoms are borne quite continuously through the season. Medium vigorous, with healthy foliage. Used as a trailer or Climber. The outside of the petal is rose-pink and the inside silvery pink. 17 large petals. \$2.50 each; 3 for \$6.60.

NEW DAWN. The everblooming Dr. W. Van Fleet. Light pink flowers in Spring and almost continuously through the Summer. The nearest to being "everblooming" of all hardy Climbers. \$1.50 each; 3 for \$4.00.

PAUL'S LEMON PILLAR. The beautiful large, white blooms are as perfect and large as any white Hybrid Tea. They are borne in abundance in midseason. Not too thorny, and with good stems for cutting. Sweetly fragrant. \$2.00 each; 3 for \$5.25.

PAUL'S SCARLET CLIMBER. All who see its numerous, well-formed, glistening scarlet flowers are thrilled by it. A strong, hardy, medium-sized, upright grower. Mid-Spring. \$1.50 each; 3 for \$4.00.

PEACE, CLIMBING. The climbing form of the popular bush Rose has just as wonderful foliage and blooms and grows strong and rapidly. It is sometimes hesitant to bloom, which may be overcome by arching its branches or training them horizontally. *Plant Pat. 932.* \$2.25 each; 3 for \$6.00.

RITZ. A showy red, everblooming Climbing Rose. It is more everblooming than any other red. The blooms are of the Floribunda type—numerous, in clusters, quite continuous and of medium size. The color is a deep, velvety red in cooler weather and a showy fiery red during the Summer. Individual blooms in the clusters are about 3 inches across and generally have 11 petals. The growth is not rampant but is strong, healthy and attains about 8 to 10 feet. This Climber is very hardy, one of its ancestors being the hardy Setigera (Prairie Rose). It was hybridized by the late M. H. Horvath and is the most everblooming of all that he originated. \$2.00 each; 3 for \$5.25.

SILVER MOON. In the late Spring beautiful cream-colored buds on long stems open to semi-double flowers about 4 inches across. They are pure white, enhanced with golden yellow stamens. One of the most vigorous of all Climbers. \$1.50 each; 3 for \$4.00.

VANGUARD. A great Rose. Grows about 10 to 12 feet tall. Has very large, shiny foliage and beautiful, immense blooms of salmon and apricot shadings. Delightful old Rose fragrance. \$2.00 each; 3 for \$5.25.

WHITE DAWN. A new everblooming white Climber. The gardenia-shaped blooms are medium-sized, double and fragrant, with about 35 small petals. The foliage is glossy and the growth moderate. \$2.00 each; 3 for \$5.25.

CULTURAL HINTS

SELECTION OF LOCATION

In selecting location for rose beds, it is not important whether plants get morning or afternoon sunlight, but that they do get at least a half day of sun. Part shade is preferable to full day of sunlight.

TREE ROOTS

Select a location where tree roots cannot interfere with rose roots. It is surprising how quickly tree roots will find a rose bed, fill it and consume food and moisture intended for Roses. If tree roots are present, dig a trench around bed as deep as tree roots extend, cutting off all that might attempt to enter bed. Trench may be filled in immediately, and should be dug every year or two if tree roots prove bothersome.

PLANT EARLY

Best time in Spring to plant Wyant Roses is soon as soil is workable. Do not wait until warm, sunshiny days. This is too late to get best results. In this latitude late March and April is ideal time. Planting may still be done in May but you will not get as much bloom the first year as if planted earlier. Fall planting is usually even safer than Spring, but if you can get your place ready to plant in the Spring, don't wait until Fall and lose a whole season of enjoyment. Hybrid Teas planted in early Spring start to bloom in June of same year.

SOILS

It is best to keep away from either extremely heavy or light soil. Loam soils have more food in them. Heavy soils can be improved and made lighter by adding peat moss, ground corn cobs or other kinds of humus. These also improve light soils and enable them to retain moisture. Use best soil you can get for Roses. Acidity and alkalinity make very little difference . . . Roses are very tolerant.

PLANTING

For successful Roses, plant bushes close together. This permits foliage to keep ground shaded and cool, makes more economical use of growing area, and culture easier. Eighteen inches apart is the rule for Hybrid Teas. Taller varieties can be placed for best visual effect.

Instead of waiting until bushes arrive, it is better to spade soil fifteen to eighteen inches deep several weeks in advance, adding plenty of peat moss or ground corn cobs. If drainage is needed, install drain-tile to carry surplus water away or build the bed up to 8 to 10 inches above the surrounding soil. Guard against roots drying out from exposure to sun, wind or freezing during planting. Do not use chemical fertilizer when planting Wyant Roses; only a little bone-meal and a lot of humus. Plant so that crown is about level with surface of soil. Whether planting in Spring or Fall, mound soil high around the branches immediately after planting to help prevent the stems from withering during time the plants are becoming established. An easy and convenient way of doing this is to use Wyant Plant Protectors. Place one around each bush, tie it, and fill with soil. Branches should then be cut off so that not more than 3 to 4 inches protrude above the protective mound. Remove this mound when bud shoots have started out. In the event Roses arrive during a Spring rainy spell — plant them anyway. Providing bed has good drainage, Roses will grow in wet equally as well as in dry soil. Use a lot of humus, don't firm the soil, pour water in the hole to settle it.

FEEDING

In Spring, apply Wyant Rose Food to established plants but not to newly set Roses. Wyant Rose Food is recommended because it is composed of 100% organics rather than synthetics. Even after long usage Wyant Rose Food does not make soil toxic. Proper fertilizing will produce more blooms. About once a month, through growing season, apply a handful of Wyant Rose Food to soil and work it into mulch or cultivate in into soil. Do not fertilize after September 1.

PRUNING

There is a certain amount of strength in branches and roots of Rose bushes; if they are cut off, that much strength is lost.

Fall pruning is not recommended. It is a waste of strength that is stored in branches. Pruning time for Hybrid Teas is Spring and consists of removing dead wood, shortening or removing weak growth, and cutting strong branches down to highest big live bud. After the big June bloom, if there is a lot of small twiggy growth on top of plant, it is well to cut it off, down to good strong growth just above a well developed eye.

The only pruning given Floribundas is to remove dead wood; or if you wish plant kept low. Hybrid Perpetuals can be shortened about one-third. In July, after first big burst of bloom is over, you may prune Climbers and Hybrid Perpetuals by cutting out oldest wood; but pruning is not recommended unless plant is too large.

Place a drop of tree dressing, shellac or thick white lead on all cut ends in Spring, when pruning is done, to keep out the carpenter bee, which makes a hole in exposed pith.

WATERING

If soil around Roses is kept cultivated, it will seldom need watering. However, during an extended drought, soak ground thoroughly for hours; do not repeat for a week. Stop all watering and cultivating September 1. An application of peat moss, ground corn cobs or other porous material put on the surface of the bed in May and left rest of season helps to retain moisture. It keeps soil cooler and in better condition for Rose growing. It may also help in disease control.

SUCKERS

Suckers are wild shoots that occasionally spring up from below point where bush has been grafted. They can be distinguished from flowering shoots by the difference in the leaves. Often thorns on suckers are entirely different from those on blooming stems. Do not call every stem with seven leaflets wild, because many flowering stems also have seven leaflets. A sucker only comes from below the graft. As soon as a sucker is discovered, cut it off clean from main plant below the ground, where it originates, without leaving a stub which would send up more shoots.

DISEASE AND INSECT CONTROL

A little attention and care will remedy the few diseases and insects that attack rose plants. Dusting is preferable to spraying. It is easier and quicker. Roses can be attacked by insects and disease such as aphids, thrips, red spiders, beetles, worms, slugs, caterpillars, etc., as well as mildew and black-spot. Any and all of these can be easily controlled by proper use of Wyant Multi-Dust which contains newly discovered insecticides more effective than anything ever obtainable in the past.

Prevent black-spot and mildew by dusting as soon as leaves come out and continue about once every week, and more often in rainy weather. Apply a light, even coat with a good dust gun on a calm evening before the dew. This will maintain foliage in healthy condition until frost. If black-spot has been prevalent, lime-sulphur used as a disinfectant can be a great help.

WINTER PROTECTION

The time-honored method of Winter protection is putting a bank of soil around branches of Hybrid Teas in late Fall before severe freezing occurs. However, Summer protection against diseases is more important in keeping your Roses alive. Bushes going into Winter in good hardened condition, having retained their foliage until freezing, will live through Winter in fine shape, without abundant covering. Keep Roses healthy in Summer.

JAPANESE BEETLES

Control this nuisance with only one application of a contagious disease "MILKY DISEASE" Japanese Beetles come from grubs under the lawn so you attack them there with Milky Disease where they are easily destroyed.

It was originated by the U.S. Dept. of Agriculture expressly for the purpose of controlling grubs of Beetles. It cannot hurt anything else, not even earth worms. Being a contagious disease it knows no lot boundaries and in time spreads throughout your neighborhood.

It takes a little time to get established but then it kills more and more Beetle grubs each succeeding year until the Beetles are eliminated.

You shake it as a sifter can on the grass areas throughout your yard or puff some down with your dust gun every 3 or 4 feet over your lawn. Milky Disease is a sensible, economical one-time control for Japanese Beetles.

Dusting is more efficient than Spraying. It is a great time saver and by using a good dust gun, the dust gets onto the the underside of the leaves better and sticks longer than a spray would. Only a light application is necessary. Try to apply the dust to dry foliage on a calm evening which generally follows a rain but start dusting as soon in the Spring as the leaves are out.

Beautiful FLORIBUNDA ROSES

Floribundas are steadily gaining in popularity every year as more and more gardeners find how delightful they can be. More than any other class of Roses, they are extremely useful in landscaping. They may be used like any other flowering shrub—as hedges, along walks and driveways, combined with evergreens in a foundation planting, as specimens, or in any way their good branching growth, healthy foliage and showy flowers may be seen to advantage. They give welcome relief from some of the over-planted shrubs that are seen everywhere.
